

GET ORGANISED

TOOL STORAGE AND ORGANISATION

GET ORGANISED ACCORDING TO TENG

There are many choices when it comes to selecting a supplier for hand tools but Teng Tools is unique in that it focusses on organisation as well as providing professional quality tools. Teng Tools has become the preferred choice of key industrial users and top motor racing teams around the world - tool users who recognise that organisation is the key to efficiency and success.

The Teng Tools concept, **Get organised**, acts on two levels: in the workshop and in the tool box. **Ready, Steady, Go!** is the system that gives you an efficient work flow, while you get order among your tools with our unique storage systems where more than 160 different TT-trays can be combined in roller cabinets and drawers to suit your needs.

GET ORGANISED: IN THE WORKSHOP

TIME

We understand the importance of time and its direct connection to profit. After examining various types of businesses in the manufacturing market we have mapped out the differences, similarities and success factors for efficient and cost effective tool management. Those factors became the foundation of our **Ready, Steady, Go!** system.

INCREASE YOUR EFFICIENCY

You will know where every tool is. Always. This increases your efficiency in each task you meet, which leads to a higher production rate. The system brings everything into order by arranging your workplace into three fundamental zones.

READY

The Ready zone contains your basic range of tools that you can lean on, but that you rarely use. It can be tools you use once a week, once a month or once a year, but as soon as you need them for your current task, you move them up to the Steady zone.

STEADY

The Steady zone contains the range of personally selected tools that you use every day. It can be in the form of a tool board, a roller cabinet or a similar product. It needs to be closely located to your Go zone to make the collecting and returning of tools more effective.

GO!

The Go zone is where you perform the actual work. You need the right space and equipment that lets you perform at your best. It is vital for the tools to be in order when you move between work activities, because lost tools equals lower production rate.

PROFITABLE BENEFITS

All businesses can benefit from the **Ready, Steady, Go!** system. It provides each workplace with the best constructive solutions depending on what it needs, to become more efficient and therefore profitable. After a thorough analysis of the typical challenges workers usually meet, we have applied the system on a common example of a workstation, to demonstrate how easily you can benefit from it.

Several employees use the same cabinet, and tools are kept in different places.

Without a good system tools disappear and unnecessary time is spent looking for them.

Rarely used tools take up work space when a good storage system is not used.

CHALLENGES IN THE WORKSHOP

Tools have to be collected in bundles when a good mobile solution is not used.

The tools become spread out when there is no natural gathering point close to the work area.

READY

The Teng Tools Tool Storage System provides you with a specific place for every tool all clearly laid out - making it easier to find and return tools. Fill it with the tool sets that you need for your specific workplace and move your rarely used tools from the Steady zone and arrange them in the drawers in the Ready zone. These solutions make you more organised and therefore more productive and cost efficient as you can spend your time working rather than looking for tools and equipment.

STEADY

After moving rarely used tools in to the Ready zone, the Steady zone is now clear and ready to use. It only contains tools that are used frequently and therefore makes it easier to find different tools and equipment. This makes you more efficient and able to finish more tasks each day.

GO!

We offer several options for carrying or transporting tools that you can use in the Go zone to become more efficient. They let you collect all the items that you need from the Ready and Steady zones in one go. Carry or transport all the tools and equipment you need to the Go zone with everything organised and ready for each job. This enables you to do each task more quickly without the need to keep going backwards and forwards to find what you need. This makes your work more productive and therefore more profitable without spending any more time than you did before.

BENEFITS FOR THE WORKSTATION

**INCREASED
EFFICIENCY**

**COST-EFFECTIVE
EXECUTION**

**ADDITIONAL
FINISHED
TASKS
PER DAY**

CHECK LIST:

1.

ANALYSE YOUR WORK-FLOW

- Are unnecessary tools lying around?
- Does every tool have a specific place?
- How often do you have to collect tools?
- Where do you put tools before and after use?

2.

SORT THROUGH

Sort through your tools, spare parts, fasteners, chemicals, accessories and consumables according to the following questions:

- Are there items that you haven't seen before?
- Are there items that are worn and need to be updated?
- Do you store items that you have no need for?

3.

PLAN YOUR ZONES

Make a plan for your workshop. Here you create a place for every single tool. You use the Ready, Steady, Go! system to divide it into three zones which improve your workflow.

4.

UPDATE

What additions do you need to make to be able to perform at your best and be most cost efficient and profitable?
Cabinets, trolleys, tools, etc.

THE BENEFITS AWAIT YOU

- Increased work efficiency creates profitability.
- Order generates a more secure workplace with a natural workflow.
- Constructive solutions let you perform at your best.
- Higher production frequency leads to additional finished tasks per day.
- Cost effective execution brings you the highest conceivable revenue.

GETTING ORGANISED AT THE RACES

The new PSRX race service tent is not only a wonder of highly organised efficiency – it has already become a renowned, very professional-looking eye catcher that attracts a lot of visitors who want to sneak a peak of the smooth work flow, as well as of three times World Champion Petter Solberg himself.

Petter and his chief mechanic Ole Johan Rustad approached Teng Tools with ideas for a new race service tent to optimise their work flow. Teng Tools has sponsored PSRX with tools and storage solutions for many years, and designing this service tent together took the co-operation even further.

The primary goal was to eliminate all the hassle of looking for tools and spare parts, to save time. PSRX simply wanted everything to be so well organised that it would be virtually impossible to put a tool back in the wrong place. And all of it had to be quick and easy to set up, and then load up again after the race.

Ready, Steady, Go!

The workshop area of the 200 m² service tent is divided into three zones, or stations, with tools and spare parts organised according to the Ready, Steady, Go concept. The first station is placed the furthest away, the second one closer to the car, and the third one – the Go zone – as close to the mechanics as possible, keeping the tools they need for the current job right next to them when working on the car.

The cabinets are equipped with customised protective hoods for safe transportation and are custom-fitted with for example extra storage options and waste baskets

based on the team's needs. There are also cabinets fitted with built-in air hose and cord reels, which is both neat and handy. And in the back, behind a glass panel, the technicians have a clear view of the service area while analysing all the data needed.

Designing and equipping this tent was a great project, and Petter and his team are very happy with the outcome. Now they know exactly where everything is at all times – even in the kitchen section, since that too is equipped with Teng Tools cabinets! PSRX race service tent is an excellent example of our Ready, Steady, Go concept, as well as of the importance of getting organised, and so far the other teams have yet to catch up with a similar solution.

GET ORGANISED: IN THE TOOL BOX

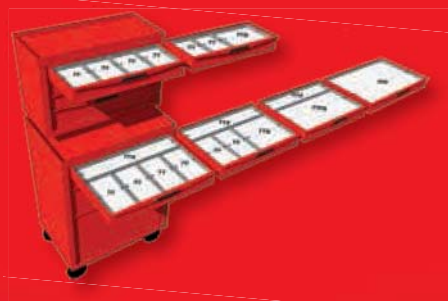

Organise your tools with the help of Teng Tools using one of our predefined tool kits or build your own individual kit using just the tools that you need. Each of the predefined kits has been compiled with the help of technicians from different trades and backgrounds, one is likely to be similar to what you need. If you can't find a kit that matches your needs then you can choose from different tool boxes and roller cabinets as well as more than 160 different tool trays and create your own tool kit.

1. Choose the storage that suits you. If you are on the road, a service case with castors and telescopic handle is ideal. If you have a permanent work-place perhaps a roller cabinet with work bench is the answer. If you move within a production site, maybe a large tool set and a small case to carry the tools you need at that particular moment is the answer.

2. Choose the tools you need to do your daily work. Our range includes close to 3,000 products, mostly in sets that fit the system.

3. Most sets have a lid that can be simply removed. The boxes can then be snapped together into a single unit. Place the trays in the storage you have selected.

STORAGE

TC-3 case

Practical case measuring 470x320x65 mm. Holds 3 TT sets and is simple to carry.

Service case

Tool case with castors and telescopic handle. Holds a full 9 TT sets and is equipped with soft castors and a telescopic handle.

Top boxes

The range includes 8 different types of top boxes. Use it separately or on the top of your roller cabinet. Holds 12 TT sets and other special tools.

Middle boxes

The middle boxes are ideal on the roller cabinet and with a top box above. Or why not as separate tool storage. Holds 12 TT sets.

Roller cabinet

The range includes 9 different roller cabinets in two different heights and with a different number of drawers. The smaller models can hold 15 TT sets and in the largest a full 50 TT sets.

Double roller cabinet

The range includes 2 different cabinet widths to choose from. They are supplied with a hard-wearing worktop and hold up to 48 TT sets.

TOOL SETS

TT set

Tool set with removable cover. There are more than 85 different TT sets to choose from in the range. Can be used as a separate tool set or as a part of the concept. 142x265 mm.

TTD set

Tool set with removable cover, double the width of a TT set. 13 different sets to choose from. Can be used as a separate tool set or as a part of the concept. 285x265 mm.

TTX set

As wide as the drawer in a roller cabinet. 28 in the range. 560x110 mm.

TTPS set

As large as the drawer in a top boxes. 6 in the range. 560x265 mm.

TTEVA set

Same size as the drawer in the roller cabinet. Manufactured of EVA foam in three different coloured layers and with recesses for tools. There are 20 different options to choose from. 560x375 mm.

TED set

Tool sets with soft EVA foam inserts. With removable cover, can be used as a separate tool set or as a part of the concept. There are 19 options to choose from. 285x265 mm. There are also 6 TEX: TTX trays with soft EVA foam inserts. 560x110 mm

TOOL STORAGE

Teng Tools tool boxes and roller cabinets have been designed to meet the high demands of quality conscious professionals from all over the world. No details are left to chance when our tool boxes and roller cabinets are manufactured. The range comprises 8 top boxes, 2 middle boxes, 11 different roller cabinets and 5 side cabinets. These can all be combined with Teng Tools tool storage systems with over 160 different TT trays in various sizes.

New to the range: Roller cabinet TCW907X

- 7 drawers with ball-bearing slides, each drawer has individual closing (a small strip in the handle is lifted up to open) – this means the drawer cannot be opened or left open accidentally.
- All drawers feature soft closing. Even if you close the drawer firmly, it slides in smoothly.

- Side handles on all top and middle boxes are rubber coated, which gives a comfortable grip when the boxes need to be carried.

- All roller cabinets are equipped with rubberised transport handles so that it is easier to move them and the handles feature a soft comfortable grip.

- All Teng Tools tool boxes and roller cabinets are made of strong, high quality steel, which gives them a longer life and greater stability. The toolboxes and roller cabinets are powder coated with rust protection in five stages as well as an under coat that extends the life of the surface finish.
- Most Teng Tools roller cabinets are equipped with 5" stable castors, which makes them easy to move. The wider cabinets are equipped with 6" castors. The castors are positioned in the corners of a U-shaped castor frame, which provides extra strength and stability.

- All drawers are equipped with three-step ball bearing slides so the drawers are easy to open and are also fully extendable, which gives better access to the tools.
- The manufacturing method used means the top and middle boxes have a capacity of 20 kg and for the roller cabinets 25, 30, or 40 kilos.
- All drawers are fitted with foam inserts to minimise scratching and to prevent loose tools from sliding around.
- Improved locking system for extra security where most tool boxes and roller cabinets now feature a code lock.
- Now there is also a more standard basic version of the roller cabinet, middle and top boxes, with the same high, Teng Tools quality, but with fewer extra accessories and 4" castors on the roller cabinet.

TOOL STORAGE

Teng Tools has a wide range of roller cabinets and drawers for tool storage.

To make it even more complete, we have added a series of side tables, shelves and accessories where you can store your tools and any other things you may need. All to help you keep order so you can do a good job.

Deep tool cabinet to place on top of roller cabinet or hanging on the wall.
TCB80A

Tool cabinet to place on top of roller cabinet or hanging on the wall.
TCB80A

Cabinets to be fitted on the side of the roller cabinet:

TCW-CAB01

TCW-CAB02

TCW-CAB03

LED light panel
589ME

TC-S01

Shelf with hooks
TCT02

Shelf for aerosols, with hooks
TCC02

TCW-SP01

If the roller cabinet is equipped with a tool panel TC-S01, the side panel TCW-SP01 needs to be fitted before the cabinet or drawer module are fitted.

Tool Storage

TC803NF 3 drawer 8 series Top Box with Ball Bearing Slides

Three full width drawers secured by a drop front cover with a combination lock, a plastic tote tray with an aluminium handle is also included. Heavy duty carrying handles on each side with rubber dipped grips for added comfort. Supplied with rubber feet and ideal for use on it's own or together with the Teng Tools TC tray or EVA tool control systems to build your own tool kit.

TTDAW12C

1/2" Composite Impact wrench

A sound absorbent, low weight composite reversible impact wrench especially designed for professional workshop applications. High torque action with dial switch for three forward speeds and two reverse speeds. Handle exhaust with 360° swivelling air intake to make the machine easier to use with little interference from the air line. Stepless trigger and ergonomically designed rubber handle for better grip and insulation from cold air and vibration. Supplied in the unique Teng Tools double TC tray with removable lid and dove tail joints for use on it's own or as part of the Teng Tools TC control system. (265x284x50mm, 2.0 kilos)

Stock No TTDAW12C | Code No. 16884-0106

TT9207 1/2" drive impact accessories

1/2" drive impact socket accessory set containing extension bars, universal joint and adaptors. For use with retaining pins and rings. Supplied in the unique Teng Tools TC tray with removable lid and dove tail joints for use on it's own or as part of the Teng Tools TC control system. (265x142x50mm, 1.05 kilos)

Adaptors		3/8"Fx1/2"M, 1/2"Fx3/4"M, 1/2"Fx3/8"M
Extension Bars	1/2" drive	3", 5" and 10
Universal Joint	1/2" drive	

Stock No TT9207 | Code No. 13246-0106

TT9207A 1/2" drive impact accessories

1/2" drive impact socket accessory set containing extension bars, universal joint and adaptors. ANSI standard type impact accessories for automotive use. Supplied in the unique Teng Tools TC tray with removable lid and dove tail joints for use on it's own or as part of the Teng Tools TC control system. (265x142x50mm, 1.05 kilos)

Adaptors		3/8"Fx1/2"M, 1/2"Fx3/4"M, 1/2"Fx3/8"M
Extension Bars	1/2" drive	3", 5" and 10
Universal Joint	1/2" drive	

Stock No TT9207A | Code No. 16068-0104

TT9024 1/4" & 3/8" drive impact socket set

24 piece set containing 1/4" drive regular and 3/8" drive regular and deep impact sockets plus an adaptor. Supplied in the unique Teng Tools TC tray with removable lid and dove tail joints for use on it's own or as part of the Teng Tools TC control system. (265x142x50mm, 1.07 kilos)

Accessories	3/8" drive		3/8"Fx1/4"M adaptor
Regular impact sockets	1/4" drive	6 point	6, 7, 8, 10, 13mm
Regular impact sockets	3/8" drive	6 point	8, 10, 11, 12, 13, 14, 16, 17, 19mm
Deep impact sockets	3/8" drive	6 point	8, 10, 11, 12, 13, 14, 16, 17, 19mm

Stock No TT9024 | Code No. 13247-0105

TT9116 1/2" drive impact socket set

Set containing 16 1/2" drive impact sockets, regular and deep. ANSI Standard suitable for automotive use. Supplied in the unique Teng Tools TC tray with removable lid and dove tail joints for use on it's own or as part of the Teng Tools TC control system. (265x142x50mm, 2.2 kilos)

Regular impact sockets	1/2" drive	6 point	13, 15, 16, 17, 18, 19, 22, 24mm
Deep impact sockets	1/2" drive	6 point	13, 15, 16, 17, 18, 19, 22, 24mm

Stock No TT9116 | Code No. 6880-0101

TT9120D 1/2" drive impact socket set

Set containing 20 1/2" drive impact sockets, regular and deep plus locking pins and O-Rings. DIN Standard suitable for industrial use with retaining rings and pins. Supplied in the unique Teng Tools TC tray with removable lid and dove tail joints for use on it's own or as part of the Teng Tools TC control system. (265x142x50mm, 3.2 kilos)

Regular impact sockets	1/2" drive	6 point	13, 15, 16, 17, 18, 19, 22, 24mm
Deep impact sockets	1/2" drive	6 point	13, 15, 16, 17, 18, 19, 22, 24mm
Locking pins			20x3.5mm, 25x3.5mm
O-Rings			3x20mm, 3x24mm

Stock No TT9120D | Code No. 14384-0106

TT9015HX 3/8" & 1/2" drive impact hex bit socket set

15 piece 3/8" and 1/2" drive hex impact socket bit set. Supplied in the unique Teng Tools TC tray with removable lid and dove tail joints for use on it's own or as part of the Teng Tools TC control system. (265x142x50mm, 1.49 kilos)

Hex impact socket bits	3/8" drive	4, 5, 6, 7, 8, 10, 12mm
Hex impact socket bits	1/2" drive	5, 6, 8, 10, 12, 14, 17mm

Stock No TT9015HX | Code No. 15141-0107

TT9212TX 1/2" drive impact TX bit socket set

Precision square	mm	150 x 100
Steel rule	mm/inch	150/6"
Scriber TC tipped		135

Stock No TTTCM05D | Code No. 16750-0206

EVA sets

In many activities and situations it is extremely important to be able to quickly check that all tools have been replaced in the correct positions in the tool box at the end of the shift or when the work is completed. The Teng Tools storage system made of EVA foam offers a cost efficient solution.

- Each tool has been scanned in a CAD CAM system and a computer controlled milling machine then cuts out each tool's exact shape in a three-coloured EVA foam block.
- The top layer of the foam is black, the intermediate layer white and the bottom layer red, so that as soon as the tool has been removed its position is clearly visible in red.
- The size and or a description of the tool is etched next to its position. This means that if a tool is missing it is not only its position that is clearly visible, but you can quickly determine which tool is involved. This makes it much easier to remember where you last used the tool and helps when you need to replace a lost tool.
- The EVA inserts fit in Teng Tools roller cabinets and in the extra deep top drawer TC805NFX.
- The range includes 20 EVA sets, 19 TED and 6 TEX.
- Use the unique Teng Tools web-based application to design your tool set, "Click and Fill", at www.tengtools.com to create your own tool set on screen.

Get organised™

EVA SETS

New to the range

- TED - 19 TTD sets with EVA foam inserts and removable cover. These snap together and sit firmly in the Teng Tools roller cabinets and tool boxes. They can also be used as a separate tool box with the cover on.
- TEX - 6 different TTX sets with EVA foam inserts.

EVA Tool Control System

TED8012 Anti Slip Combination Spanner Set **NEW!**

12 piece metric combination spanner set featuring a typically Teng new design in combination spanners that gives an anti slip grip on the open end as well as the Teng Tools hip grip function where the spanner drives on the flank of the fastening rather than the corner, two design features that combine to give a much better grip with much less risk of damage to the fastening. The design also gives grip on fastenings with worn or rounded corners. Supplied in the unique Teng Tools double width TC tray with removable lid and dove tail joints for use on it's own or as part of the Teng Tools TC control system. The tools are held in place using the Teng Tools three colour pre-cut EVA foam tool control system. (265x284x50mm, 1.50 kilos)

Stock No TED8012 | Code No. 23850-0102

Measuring tools	3 meter measuring tape, 200mm steel rule

RACKING SYSTEM

Order in the stores with Teng Tools

Teng Tools takes Get Organised a step further! We now help you create order in the stores and in the warehouse.

We have developed a stable racking system with different modules which can be combined together in numerous different ways. You can easily tailor a storage system that suits the activities and work flow using corner sections, narrow or wide sections, drawer modules and shelves. And as the icing on the cake, there is a mobile trolley in two different widths in the same system.

Easy to assemble

The racking system is supplied as a flat pack and is easy to assemble. See the instructions at www.tengtools.com under Manuals.

Work Bench System

The Teng Tools roller cabinet based work bench system has been developed to be extremely flexible enabling you to create a work station that suits your particular needs.

A simple system that uses a relatively small number of different components to enable you to build an endless variety of work station configurations. Simply start with one or more Teng Tools roller cabinets or roller cabinet based tool kits and add work surfaces and back panels to give a working surface and the ability to hang additional tools and accessories using the wide range of Teng Tools hook on or magnetic shelves, hooks and wall racks.

Header Boards

Header boards for use with tool panels when building a work station. Available in two sizes to suit different size panels. Painted sheet metal construction.

Fully lockable wall mounted tool cabinet with sliding shutter front with a Teng Tools combination lock. Inside panel has square peg holes following the same system as the Teng Tools work bench panels and roller cabinet side plates. 1,800mm wide x 700mm high x 200mm deep. Weight 50 kilos.

Stock No TCB180 | Code No. 23780-0107

POLE POSITION ACCORDING TO TENG

OLE JOHAN, Chief Mechanic

Petter Solbergs rallycross car is maintained by me and my Teng Tools storage unit TCMM1055N. It's filled with 1055 pieces in 51 tool sets. All chosen by me, according to my preferences. For some, things organised perfectly might seem boring, but when it comes to chasing seconds, it's vital. Welcome to our world!

Get organised™

TOOL KITS

Organise your workshop with the help of Teng Tools!

Teng Tools is comparatively unique as we offer a complete system, which allows you to create your own tool sets in a structured and organised fashion.

Choose from different tool boxes and roller cabinets as well as more than 160 different TT trays and create your own tool sets with the help of our web-based application Click and Fill.

However, Teng Tools has put together a number of turnkey tool sets to make the selection process easier. The various proposals – which comprise everything from small portable tool sets to the huge Monster Mega Master with its 1,190 pieces – have been developed in collaboration with professional users from the automotive sector and other industries.

- Choose from our turnkey tool sets – there are 19 different sets in all sizes – or create your own personal tool set.
- There are more than 85 different TT trays, 13 different TTD sets, more than 25 extra-long TTX sets, 6 PS sets, 20 EVA sets in foam and 25 of the new TED sets with EVA-foam-inserts to choose from. This gives you the opportunity to design a personal, yet very well organised and space efficient tool set.
- Choose between 22 different tool boxes and roller cabinets as well as service cases.
- Freely combine TT trays and tool boxes – there is virtually an unlimited number of tool set possibilities for any application.

LIKE CLOCKWORK ACCORDING TO TENG

ANNA, Maintenance Engineer

Production stops make for a bad day. You want the manufacturing process to flow like it should. To get that, you need a perfectly tuned workstation. For some, things organised perfectly might seem boring, but when it comes to get things to run like clockwork, it's vital. Welcome to our world!

EVA01 Design your own EVA tray

NEW!

A blank, uncut EVA tray that can be cut manually or at a specialist cutting company to suit your own individual requirements. Alternatively Teng Tools are able to manufacture EVA trays to suit your own individual design – full details are available on request. (570x375x50mm)

Stock No EVA01 | Code No. 17418-0109

An example of an individually personalised EVA tool tray manufactured to special order.

Case

- A moulded robust plastic body makes the case strong and stable.
- The transport castors are made of rubber making the case easy to pull and prevent it from sliding.
- The retractable telescopic handle is a comfortable length that makes it easy to pull the case.
- The case is equipped with a code lock to protect your tools.
- The rubber feet mean the case does not slide around or damage painted surfaces.
- Carrying handles on the short and long sides to satisfy all needs.

Tool storage

- A part of the Teng Tools tool storage system that holds a total of nine TT sets with three TT sets in each compartment.
- Each compartment has a transparent lid, so that you have a clear view of the tools and so that they are held in place when transporting the case.
- The centre compartment sits loose in the case and can be easily lifted out when you need your tools.

Your choice

- Four suggested complete mobile tool sets that suit most users.
- The case is also available without tools, so that you can choose any combination from the Teng Tools range of more than 160 different TT sets to create your own personal set of tools.
- Go to www.tengtools.com and "Click & Fill" to create your own personal content for your service case.

SERVICE CASES

Organise and keep order with the help of Teng Tools!

With quality, easy management and design in mind, Teng Tools has developed a new way to organise your tools, even when you are on the go! It's called the Teng Tools Service Case and is an extension of the Teng Tools tool storage system.
